

About Ceremony

Ceremony is an unprecedented typeface designed by Studio Joost Grootens, which derives from their information design practice. Including an extended Latin character set, Ceremony is fundamentally an impressive and exciting labels and icons typeface family.

Based in Amsterdam, Joost Grootens is well-known for his innovative approach to atlases—a field for which he regularly set new milestones in compelling books, including *Metropolitan World Atlas* published in 2005, *Atlas of the Conflict* published in 2010, and *Atlas of the Functional City* in 2015, to name just a few. To meet the specific requirements of his map and index designs, with his studio, Grootens developed a library of icons that, over a six-year period, was continuously added to and refined. The resulting typeface is an outstanding tool that defines a new standard for typography in information design.

The Ceremony family includes 77 different styles, presenting positive and negative geometric shapes. Each style encapsulates one hundred and 78 pictograms, in addition to a complete Latin character set. This useful and cheerful typeface will certainly enhance graphic representations of any project.

 Fractions [frac]

All Optimo fonts have at least three basic pre-built fractions (1/2, 1/4, 3/4).

 Ordinals [ordn]

This feature replaces any letter following a numeral with its matching superior letters. Spanish, Portuguese and Italian language uses the feminine and masculine ordinal indicators such as 'a' for for 1º, 1ª. Ordinals are designed to match the weight of the typeface.

 Superscript/Superiors [sup]

This feature substitutes glyphs with their matching smaller alternates which are set slightly above the height of the capital letters. These glyphs are reduced in size and designed slightly heavier to keep them consistent with the rest of the font.

Contextual Alternates [calt]

This feature adapts a glyph after its surrounding context. This feature is usually active by default in Adobe applications. For Ceremony, it gives the direct access to the pictograms by typing a simple reference (e.g. p 1.1). See the complete list of references below.
